MESSAGE: To whom it may concern: I am contacting you regarding the plan to store nuclear waste at Yucca Mountain in Nevada. As a resident of Las Vegas, NV, I am extremely opposed to this plan. Not only do I feel that this plan is being shoved down the throats of Southern Nevadans, I believe that the hope of the proponents of this plan is that we will be apathetic to the idea. I think that not all the issues are being taken into account thoroughly and I feel like this plan is trying to be sped by us before we have time to react. I live approximately 1/4 mile from the route that the trucks carrying the nuclear waste would travel. I don't know if you are aware of this, but it's not exactly the safest highway in town. As a father of 2 little girls, I want this dangerous waste nowhere near my children. I feel there is a blatant disregard for the safety of my fellow Las Vegans. As citizens, if we do not want nuclear waste traveling through our city, we have the right to NOT have it go through our city. As government officials, your job is to serve the will of the people, not the plans of special interest groups. Please do not let us down. Brett Lundquist A concerned parent and citizen of Las Vegas, Nevada
