Dear Ms. Hanlon:

I am writing to urge that the DOE recommend to President Bush that Yucca Mountain be designated the nation's repository for high-level radioactive waste and spent fuel.

It is high time that we resolve this issue, and that we move forward with the Yucca Mountain solution. Additional debate will simply add to the already excessive cost that has been spent studying this. With the events we as a Country have been dealing with, it has become more obvious that we need our government to be firm, decisive and reasonable.

Please recommend the Yucca Mountain site to our President.

Sincerely,

Paul R. Bonney
