Subject: Yucca Mountain Preliminary Site Suitability Evaluation

Part of Records Package / Supplement / Correction

Ms. Carol Hanlon

I believe the Yucca Mountain Site that the DOE has identified as a repository for nuclear waste is a suitable location. We should not delay this decision any further. Now more than ever this country needs to support the nuclear energy industry. We must continue to develop new technology and continue to decrease our supply of energy based on petroleum and other depleting natural resources that are often controlled by countries outside the USA. I realize this is an emotional issue and there are some organizations who oppose this site, those organizations or other like it will always oppose this type of facility. It is not prudent to ignore our future energy needs or to allow others to keep this country from developing a strong reliable and efficient energy supply. I urge you to move forward and recommend the Yucca Mountain site to the President as a permanent national repository.
