--> Comment Text :
Please, Nevada does not need Yucca Mountain to be a repoistory.

When I was young and was in Girl Scout we learned to take everything out that would harm the site we were camping in. You cannot do this and be sure that the ground and ground water will be safe.

At this time and with a Nuclear Site so close to Las Vegas, none of my family will ever come and visit. You will put children and women/men at risk for health issues, who currently live here.

The government has done nothing for the Test Site personnel who are sick from just doing their jobs. What about those people who will be sick from whatever they will get from being so close to the repoistory?

Do not issue the license for the Yucca Mountain Site, rethink Hanford
Washington, or what about any where in Texas.
