14 MR. BERGER: Hello, thank you.

15 MODERATOR BROWN: Sure.

16 MR. BERGER: Hello, my name's Brett Berger.

17 And thank you for this opportunity. Thank you for

18 listening.

19 First want to say, God bless America. And

20 God bless Mother Earth. And God bless freedom of

21 speech.

22 America is at war, and the war has changed,

23 or the war has and will change all our thoughts on

24 every issue in our life forever. Nuclear, chemical and

25 truck bombs are one of our many new fears. Air, water

0112

1 and food are all possible targets in this long war. I

2 was personally told that our military government

3 believes in limited nuclear war, and believes it's

4 winnable. This high-level dump, and the transporting

5 of it, gives terrorists many more targets and many more

6 possibilities of nuclear war.

7 Why do terrorists hate us so? Because the

8 government speaks with forked tongue in everything it

9 does. America has lied to me and many other people,

---

**552361**

10 and many other countries in history. Lies may be a  
11 hard word, and maybe blind belief would be a better  
12 word.

13 One day our government -- one day, your  
14 government's your friend. As long as you believe.  
15 America's shortsighted. If not -- if you -- if not,  
16 you are the problem. No gray area is allowed. America  
17 is shortsighted, like a kid playing checkers. Quickly  
18 king me. The rest of the world is playing chess, and  
19 looking at the long-term future.

20 I love the Grand Canyon, the Hoover Dam, and  
21 the entertainment capital of the world. With all this,  
22 why would we want a high-level nuclear dump only an  
23 hour and a half away? Or 10,000 years from now, on top  
24 of it. This is a conundrum. There's no problems, only  
25 solutions. Communication is the only way.

0113

1 Let's leave the waste where it's at. It's  
2 already on high alert. And I would like to bring one  
3 more fact. It's not the science. When I was in the  
4 military, I was told something, that in any accident,  
5 human error is 92 percent, and 6 percent is mechanical,  
6 and 2 percent nature. And that's what I worry about,

**552361**

7 is the human error. Not the science and not the

8 politics, but just the blind belief that we are

9 infallible. Thank you.
