I've reviewed the Yucca Mountain Preliminary Site Suitability

Recommendation document online in some detail, but fail to see  
a specific recommendation?

Based upon this document, and upon both the YM Science and  
Engineering Report (on which I will fax some comments later)  
and the earlier Viabililty Assessment of a Repository at  
Yucca Mountain, it is my opinion that there is an obvoius  
recommendation to be made and both an urgent and critical need  
to make it. The recommendation which must be made, and is fully  
justifiable on the record, is to proceed immediatly with the

implementation phase of the project!

There is a time in any project where further study is simply wasteful, and that time is past for Yucca Mountain. Let us begin immediately with the next phase of the implementation procedure.
