 --> Comment Text :
 Yucca Mountain IS way too dangerous to store any nuclear waste since any accident, Bombing, or damage can cause serious harm to the nearby population which in my opinion is MORE important than you people making money. WHY doesn't the Dept. of energy come up with another location far enough away from any populated town. I'm sure with all the intelligent people ther you can come up with other ideas. Or give the consideration of so many citizen's rights and consider another's suggestion of where to store this stuff. You should Not do what was done years ago as ther are even 1000's mor people here now. And IF there was an accident or potential Danger tom us, You again would Not let the public know immediately as you have always been unfairly secretive amongst your employees and THAT is WRONG. So PLEASE change your ways which were mistakes in the past and listen to the people and respond accordingly. Thank-you.
