I am so glad I was born in the USA. However, that doesn't mean I agree with everything that our government does.

IT'S INEVITABLE: Like it or not Nevada WILL host the Nuclear Waste Dump!!!

I know the Nuclear Waste must be stored somewhere, but I am not happy it is in my adopted state. Since it is going to be here anyway we may as well accept it and accept any money that comes with it. Maybe we can reap some benefit from it - lower taxes, lower electric bills that were just raised 28% and are going up again, and gas which will be increasing more than once.

The government is not protecting it's citizens. How are they going to protect Las Vegans/Nevadans against this "waste" if they won't admit there is such a place as Area 51 at Yucca Mtn.

When the Waste is finally dumped at the NV Test Site/Yucca Mtn. are the trucks delivering this waste going to have special roads to travel, or are they going to come thru the middle of town? To protect all So. Nevadans - the building of special roads should be done prior, and paid for by the government.

Is a plan being proposed in case of accidents so citizens will be protected in case of an accident. Truck drivers have been known to fall asleep at the wheel.

How say you? Do you have any answers for me?
