 To Whom It May Concern,

I'm opposed to using Yucca Mountain as repository for nuclear waste. Since Las Vegas power is not derived from nuclear energy I don't feel nuclear waste should be stored close to where I and a million other people live. It is a danger to transport it there and I'm not convinced that problems couldn't arise such as earthquakes and possible leakage into the ground water. Lastly, the new threat of terrorist activity would make for a catastrophe of unknown proportions if such an event happened.

It is my belief that the areas that use nuclear energy store it closer to their site and or suitable efforts be made to break the waste into harmless matter. I'm not a scientist but it seems to me that if we can figure a way to make nuclear waste we can figure a way to make it harmless once again. If we can't maybe we shouldn't use nuclear and instead develop more sustainable methods of energy production.

553072

Once again I don't want your waste in my back yard. Thank you for your time.

Sincerely,

Peter Sittler
