Comments: I do not understand why Yucca Mountain is being studied as a proposed site for nuclear waste. Only 100 Miles from the City of Las Vegas, a world reknown resort city. This city could be classified as one of the wonders of the world. During these tense times in the history of the United States I believe this to be a major hazard to the State of Nevada. Our population is growing in hugh proportions and will continue to do so for many years. I strongly believe placing this site so very close to a hugh population is down right crazy. We within the United States have many parts of our United States that contain vast lands that are not inhabited for thousands of miles. Why not consider them? No, you have not studied any other site for nuclear waste but Nevada....Why?
