Dear Ms. Hanlon:

Thousands of public comments on the Draft Environmental Impact Statement have not been addressed regarding a high-level nuclear waste dump at Yucca Mountain. Yet, the Secretary of Energy is preparing to make a recommendation. Why?

Without a Final Environmental Impact Statement, a detailed transportation scenario or a licencing rule, the DOE lacks the basis for consideration of site suitability. The public cannot have confidence in any recommendation that arises from such a flawed process.

I urge you to support abandoning the Yucca Mountain project.

Sincerely,

Charles Zalac
