

Julie Shaw

OCT 12 2001

Virginia City, Nevada Public Meeting

19 JULIE SHAW: My name is Julie Shaw, and I've
20 lived in Virginia City for 20 years. And I guess my main
21 concern is I'm just afraid of more toxins and things
22 happening, and the dangers that could happen from this being
23 transported through our state. I know it has to go somewhere.
24 I wish it wouldn't have to be here. I don't know where I
25 would wish it. If I could make it disappear, that would be
0009

1 great. I can't do that, but it just frightens me.

2 I just believe that there is not a lot we can do
3 if somebody decides to mess with us, or if we have an
4 accident. And I would hope, scientifically, if they have to
5 do this, that they can prove without a doubt that nothing
6 could happen, and I just don't believe that is possible.

7 I'm just having a real hard time with the safety
8 factor. And we are already so poisoned on toxics in this
9 world -- My grandchildren don't live here, but it could happen
10 anywhere, I guess. So I'm hoping that it doesn't happen here
11 in Nevada.

12 And that's it. That's all I've got to say.
