

Oryctes nevadensis* S. Watson*ORYCTES****FAMILY:** Solanaceae, the nightshade family.**STATUS:**

Heritage Program SENSITIVE LIST, ranks: G2G3 S2S3

USFWS/ESA: species of concern. STATE OF NEVADA: none. BLM: Special Status Species in Nevada.

USFS: none. NNNPS: watch list.

POPULATION CENSUS (NEVADA): 37 occurrences mapped at 1.0 km (0.6 mi) separation, OR 68 occurrences mapped at 0.16 km (0.1 mi) separation; total estimated individuals 24,000+, total estimated area 58.9+ ha (146+ ac).
TREND: unknown.**IMPACTS AND MAJOR THREATS (NEVADA):** No summary available (see references).**INVENTORY EFFORT (NEVADA):** Targeted surveys have been extensive in some areas but have not been comprehensive, and much potential habitat remains to be explored. Most recent entered survey 1998, average year of last survey 1984. Years since last entered survey (percent of mapped records at various survey ages): 0-5 yrs: 2.9%; 11-20 yrs: 63.2%; 21-30 yrs: 30.9%; 51+ yrs or unknown: 2.9%.**LAND MANAGEMENT (NEVADA)** in decreasing predominance: private lands, U. S. Bureau of Reclamation, U. S. Bureau of Land Management, Native American lands, U. S. Fish and Wildlife Service (?), Nevada state lands (?), U. S. Department of Defense (?).**RANGE:** Churchill, Esmeralda (?), Humboldt, Mineral, Pershing, Storey (?), and Washoe counties, Nevada; also in CA. Maximum Nevada range dimension 276.8 km (172.0 mi) excluding most disjunct record.**ELEVATIONS RECORDED (NEVADA):** 3900-5960 feet (1189-1817 meters).**HABITAT (NEVADA):** Deep loose sand of stabilized dunes, washes, and valley flats, on various slopes and aspects, variously associated with Psorothamnus polydenius, Tetradymia tetrameres, T. glabrata, Sarcobatus vermiculatus, S. baileyi, Atriplex canescens, A. confertifolia, Krascheninnikovia lanata, Grayia spinosa, Eriogonum nummularium, Achnatherum hymenoides, Hesperostipa comata, Oenothera deltoides, Cymopterus corrugatus, Penstemon arenarius, Gilia micromeria, Astragalus geyeri, Phacelia bicolor, Nama densum, N. aretioides, etc. Dependent on sand dunes or deep sand in Nevada.**PHENOLOGY:** flowering late-spring. Range of most frequent survey months: May-June.**LIFE-FORM AND HABIT:** small annual.**DESCRIPTION:** This annual appears only in years with optimal rainfall and temperature patterns, and is therefore difficult to inventory.**PHOTOGRAPHS:** Nevada Natural Heritage Program images web page (1998-present), slide collection (1986-present), and files.**ILLUSTRATIONS:** Cronquist et al. (1984), Mozingo and Williams (1980).**OTHER GENERAL REFERENCES** (listed separately): Hickman (1993).**SPECIFIC REFERENCES:**

NEVADA RARE PLANT ATLAS

INDEX TO MAPS AND FACT SHEETS

(8 August 2001)

This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, whether or not included in the current Nevada Rare Plant Atlas. Atlas fact sheets and maps are available and linked for over 80% of these taxa. PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections for further information on the sources and limitations of the data represented on the maps and fact sheets, and for general references cited only in brief in the fact sheets. Fact sheets are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. Images, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. Updated maps and fact sheets will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.

Map Printing and Display: Due to storage limitations, the map images linked to this web page are **not** reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the first image that displays is **formatted for best printing results, even though the screen display may appear degraded.** To best approximate an original printed version: change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then print pages 1 to 1 of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its **best display quality on your screen**, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.

	<u>Scientific Name</u>	<u>Common Name</u>	<u>Family</u>
