Title: Nevada Division of Water Resources Well Log Database/Domestic Well Data - Caliente Alignment

Author: Nevada Division of Water Resources

Date Created: 09/12/2007 and 11/08/2007

QA Level: NA

File listing: Adobe Acrobat® Files

Metadata: The data consist of the following:

1. All well log data for hydrographic areas crossed by the proposed Caliente alignment as well as well log data for hydrographic area 205 – Data obtained on 09/12/2007 using the on-line NDWR Well Log Database Website Query Tool.

2. Domestic well log data for existing domestic wells obtained on 09/12/2007 directly from the ACCESS® 2000 zipped data file downloaded from the on-line NDWR Well Log Database website on that date that are located either:

   a. Within 9.7 kilometers (6 miles) of the centerlines of the proposed Caliente alignment segments or
   b. Within 9.7 kilometers (6 miles) of proposed new well locations for the Caliente alignment tentatively identified as targeting a potential fault-associated groundwater zone.

3. All well log data for hydrographic areas 147, 148, 157, and 230 that lie within either 9.7 kilometers (6 miles) of the centerlines of the proposed Caliente alignment segments or within 6 miles of proposed new well locations tentatively identified as targeting a potential fault-associated groundwater zone – data obtained on 11/08/2007 using the on-line NDWR Well Log Database Website Query Tool.
