Re: Nuclear Waste

To whom it may concern:

I don't know what President Bush and his Administration thinks when it comes to Nevada, I think that they don't believe that Nevada is part of the United States. [Being that Las Vegas is approximately 90 miles from the site and is also known as "The Entertainment Capital of the World", is not the only reason I do not want the site here. Our Streets, Bridges and Railroads are not safe for the transportation of nuclear waste as was proven by the Bridge in Minnesota collapsing. Nevada is a dangerous State being that it is 24/7, it doesn't need another issue added on to it.

Please find a way that nuclear waste stays in the State it was produced. I don't believe our budget will facilitate the construction of a new railroad to move dangerous nuclear waste to our State. [We need somebody like Senator Reid to fight for our State on important Nevada Issue such as this. Its gone on far too! too! long.

Sincerely,

Joyce Young
