Comment Text :--> Re: comment on supplements (SEIS) on Repository at Yucca Mountain and
draft SEIS and EIS for Nevada Rail Corridor

1 ["No action" for all three EISs is the only possible course of action. The single national site for storage of nuclear waste is a very bad idea. Moving the waste is too dangerous. It should be contained as close as possible to the sites where it is generated. We cannot risk moving the waste around the country, making it vulnerable to accidents and to numerous possible terrorist attacks.]

Very truly yours,
Catherine P. Smith
