1 [that site has been shown over and over and over to be UNSAFE, yet you continue with the project like it was nothing. Las Vegas is a city of over 1 million people, I used to be one of them until it grew to fast..... this project has given jobs to many but the whole thing is a government sham, typical government b.s. to the highest level!! You take ground sacred to the Shoshone, haven't we (the white people) taken enough from the Native People?? The U.S. Dept. of Energy is a pig headed bunch of people who don't give a damn about anything or anyone..... I know, I worked on the project that wound up in Aiken, S.C., of that I am not proud.]
