To the DOE;

[Please, you must have done your research, you must know that Yucca Mountain, which is the proposed nation's high-level nuclear waste dump, is leaky and geologically unstable. All evidence points to an active magma pocket below the site.

In addition, both the Western Shoshone Nation, which considers this sacred Shoshone land, and the State of Nevada itself, oppose this dump.

PLEASE do not let this plan go ahead and instead do everything in your power to eradicate nuclear power, and thus nuclear waste with its half life of 10s of 1,000s of years of unthinkable toxicity. Please do what is right for our children and grandchildren all the coming generations, so they can look to us as the one generation that chose wisely on this issue.]

Thank you,
Lorrie Ogren
