Comment Text :

1 ---> [Yucca Mountain belongs to the Western Shoshone people, as declared by the Ruby Valley Treaty which is still in effect. Return their land to its original state, and leave it to them!! Get out of Yucca Mountain!!!]

2 [Yucca is NOT safe as a repository site. It lies on earthquake faults galore.]

3 [Moisture from within the mountain corrodes the canisters supposedly safe for thousands of years, which are already leaking.]

4 [Reports about the safety of this site have been falsified.]

When it becomes evident that this site cannot meet the required safety standards, instead of abandoning the site the standards have been repeatedly lowered. This is unconscionable and lethal!

Some radioactive wastes remain lethal for hundreds of thousands of years. An underground repository is a very BAD idea, for out of sight means out of mind, while radiation will be leaking into soil and water tables. Nuclear wastes need to be kept above ground and monitored and guarded constantly, for spans of time we cannot even comprehend.]

2 [Yucca Mountain is NO WAY appropriate for a nuclear waste repository. GET OUT of there, and declare the idea dead forever. The human race will appreciate it.]
