MY Comment on the use of Yucca Mountain as a repository for nuclear waste:

NOT! Because:

- 1 [ 1. Transporting nuclear waste is too hazardous;
- 2 [ 2. There are 13 fault lines under it.
3. Waste already accumulated would more than fill it already ]
- 2 [ 4. It is Western Shoshone Land and flouts the treaty made by the people of this tribe with the U.S. They do not want that use of their land. ]
- cont [ 5. Since nuclear waste is too dangerous to be transported it must be as safely as possible stored where it is.
