[ My name is Patricia Moncada and I am writing to let you know that it would be a mistake to make Yucca Mountain a place in which to deposit nuclear waste. Its shocking that such little importance is given to such sacred places. Its absolutely sacriligious to use a church as a landfill so it is the same with depositing nuclear waste in Yucca Mountain. For the Shoshone its a place associated with higher powers, with the spirit world. It is about time the injustice comes to a halt. Isnt it enough that these people have been savagely massacred and displaced?  
Also take a look at our earth. Each day it becomes worse and we complain about the sudden changes in the weather and in the environment. Mother Earth can only take so much and we are clearly exploiting her and in doing so we come closer to the end of mankind due to our own negligence and greed. We had the brains to create such destructive forces, lets start using the same brains to come up with a healthier souldion to the problem but do not pretend to solve it. Lastly remember that Yucca Mountain is on many active faults. Depositing nuclear waste there could turn into a hazard for many. ]  
Thank You.
