

* To Whom It may Concern:

1 [I am a 40 year Nevada Resident, and I do not oppose Nuclear materials being stored in
2 Yucca Mountain. I do however, oppose the mode of transportation. The infrastructure for
truck transportation is already there, why go through the tremendous expense of building
a new railroad. All they have to do is upgrade existing roads. The reason I do not oppose
the waste in Yucca mountain is because I believe that one location is easier to protect
than having several locations throught the country. Right now if there was some type of
organized terroristic act, they could target all sites that contain Nuclear Waste, and it
would be much harder to protect and deal with if those storages were compromised.

thank you for the opportunity]

Bernie Romero
